- Mechanical Repairs
- Gel coat Repairs

Our Services

We restore the original look of teak surfaces of your vessel and use oil and wax if requested. We inspect the joints and fixedness of teak on the deck if necessary in order to prevent water from reaching the space between the teak deck and the hull.

Reviews

We recommend maintenance of teak decks at least a few times per season either by the owner himself or herself or by professionals. When the deck becomes faded and pores gather dirt, the maintenance process may later be considerably more labour-intensive and expensive.

Our features and advantage

We help assess the condition of rigging components by inspecting the sails, shrouds, sheets, blocks, stoppers, winches and the operation thereof (including maintenance of winches). We can fix the mast or replace a worn sheet or block. We can access the masthead in the event that wind sensors or masthead lights need to be

adjusted.

Team Commitment

The qualified and experienced mechanics of Yachts Service perform maintenance work on and repair any type of boat motors and are in possession of official maintenance rights for Volvo Penta motors.

Our quality of service

We help assess the condition of rigging components by inspecting the sails, shrouds, sheets, blocks, stoppers, winches and the operation thereof (including maintenance of winches).
